

PLAYER: LEE - JUNG-HOO TEAM: KIWOOM HEROES #: 51 REPORT #: 1 INNINGS: 45 FV: 60

POSITION: OF HT: 6'1" WT: 171 BAT: L THROW: R AGE: 21 DATE OF REPORT: 6/3/2020

TOOLS	P	F	COMMENTS	APPROACH:
HIT	45	65	Level swing that generates good loft at times, generally on the lower pitches he can get underneath and drive the ball into deep parts of the field. Keeps bat in the zone long. + Bat-to-ball skills with an advanced approach at the plate for his young age. Pull heavy hitter, learning to use the other way. Loud bat. Hard contact to the Pull side. Covers plate well early in count., Has trouble on hard inside FB. Lays off low away early. Late in counts, some guessing/ chase, but able to make contact more times than not. Swing gets long at times. Doesn't get cheated often.	PULL - BALANCED - OPPO PHYSICAL DESCRIPTION: Projectable frame, room to add strength. Long arms. Long legs, high waist. No glasses. No known injuries. KBO Bloodlines - Father former MVP. Body type similar to Michael Brantley.
RAW PWR	40	65	Big extension and follow through. Good lift to the swing. Generates PWR to both Gaps, mostly Pull PWR for now.	STRENGTHS: Doesn't get cheated at the plate. Picks up the ball early out of the hand, + plate coverage. + bat-to-ball skills, finds the barrel more times than not. Strong kid who will get stronger, PWR is starting to show. More to come.
GAME PWR	35	55	PWR is on its way with added strength. Adding loft and ++ extension.	
PLATE DISC	50	65	Patient hitter, works counts. Does not K much, BBs just as often as K. Looks for pitch over the plate, extends arms, lays off low away early, tends to roll over with 2 strikes when chasing, but gets bat to the ball.	Patient at the plate willing to hit with 2 strikes, work counts looking for a pitch he can hit hard. + Defensively all around + Arm strength with an accurate arm to match. ++ reads and jumps off the bat. Very strong coming in on the ball. Stays in well vs LHP.
FIELD	65	65	Ability to play all OF spots at a + level. + Instincts. Great 1st jumps. Consistently stealing base hits away. Really good ability to "recover" on balls with a wrong read. Good mechanics throughout. Plays with no fear.	
RANGE	65	60	Really good range all around the field, all directions, Very strong/fearless going to foul territory, best coming in on balls, gets phenomenal reads. Has some trouble going directly back on line drives by RHH.	WEAKNESSES: FB Inside gives slight trouble. Late in counts will roll over to 1st/2nd base on off speed, sometimes able to find the hole or hook it around the 1B bag. Trouble with line drives directly behind him, twists and turns in route to the ball, able to make plays most of the time, but routes need to improve. Not much of a base stealer, speed plays better in OF and basepaths. Will attempt to steal with roughly 60% success rate. Heavy pull hitter. Shows flashes of using whole field, and will improve.
ARM STR	65	70	Strong arm. Ball stays strong through the target. Great mechanics, gets on top of throws well. Slightly long throwing motion. Keeps throws low/firm	
ARM ACC	65	65	Ball has minimal tail to it. Gets over top. Accurate. On target consistently. Gives a receivable bounce when necessary.	
RUN	55	45	Long strides. Falls off slightly to 1B on outside pitches when fooled trying to pull them. Good speed, takes avg turns on basepaths, could be better. Speed plays best in the OF with his ++ jumps/reads and quick bursts.	STANCE: Extremely open stance to start. Head on shoulder long until swing starts. High hands, Bring front foot square timed with pitchers leg kick. Then strides towards the pitcher. Generates + torque. Lets him open the front side, but stay on most every pitch, with ++ plate coverage.
STEAL	35	35	Not a big threat, SB Jumps are inconsistent. Will swipe 5-10 SB seasons moving forward, but with a near 60% success rate. Prefer him to not steal, utilize his baserunning. Have not seen an SB attempt, 2/2 on year	
BASERUN	60	55	Much better base runner then a base stealer. Good turns, cuts angles well	
ATHLETE	70	65	Lots of energy throughout his game, quick bursts, twitchy, looks the part	

RUN TIMES:	HM to 1st: 4.20 sec	HM to 2nd: 8.04 sec	HM to 3rd: 11.50 sec	SB 2nd: N/A	1st to 3rd: N/A	2nd to HM: N/A
-------------------	----------------------------	----------------------------	-----------------------------	--------------------	------------------------	-----------------------

REPORT SUMMATION:	By time he is eligible to be posted, I expect his PWR and strength to be close to fully developed and be showing that consistent league avg or better PWR numbers, to pair with his + hit tool and ability to find the barrel. Winner of Gold Glove equivalent, and ROY Defense will translate immediately. He can play any OF spot, best in RF as he matures. + Defender in the big leagues right now. And will continue to be for the foreseeable future due to his jumps, reactions, and above avg speed he has. I expect the speed to slow and become slightly below league average when he fills out with more weight/strength. Top-Middle of the order bat. Yearly All-Star consideration. Will have all teams interested
